## **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/5/07 has been entered.

Claims 1-31 have been canceled previously and claims 33, 35-43 have been canceled in the amendment filed 11/5/07. Amended claims 32, 34 (11/5/07) are pending and under consideration by the Examiner.

- 2. Receipt of applicant's arguments filed on 11/5/2007 is acknowledged.
- 3. The following previous rejections and objections are withdrawn in light of applicants amendments filed on 11/5/2007:
- (i) the rejection of claims 32-35, and 40-43 under 35 U.S.C. 112, first paragraph, for scope of enablement.
- 4. Applicants arguments filed on 11/5/2007 have been fully considered and were persuasive. The new issues are stated below.
- 5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

## Claim rejections-35 USC § 112, first paragraph

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to

10/774,887

Art Unit: 1646

make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6a. Claims 32, 34, are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The hybridoma cell line, ATCC HB-12525 (see specification, page 8, lines 28-29 and 35-36), producing antibody BION-1 which is recited in the claims is essential to the claimed invention. The reproduction of antibodies from the disclosed hybridoma is an extremely unpredictable event. The hybridoma with accession number ATCC HB-12525, disclosed on page 8, of the specification, must be obtainable by a repeatable method set forth in the specification or otherwise be readily available to the public. The instant specification does not disclose a repeatable process to obtain the hybridoma, and it is not apparent if the hybridoma is readily available to the public. If the deposits have been made under the terms of the Budapest Treaty, an affidavit or declaration by applicants or someone associated with the patent owner who is in a position to make such assurances, or a statement by an attorney of record over his or her signature, stating that the hybridomas have been deposited under the Budapest Treaty and that the hybridomas will be irrevocably and without restriction or condition be released to the public upon the issuance of a patent would satisfy the deposit requirement made herein. See 37 CFR 1.808. Further, the record must be clear that the deposit will be maintained in a public depository for a period of 30 years after the date of deposit or 5 years after the last request for a sample or for the enforceable life of the patent whichever is longer. See 37 CFR 1.806. If the

. Application/Control Number:

10/774,887

Art Unit: 1646

Page 4

deposit has not been made under the Budapest treaty, then an affidavit or declaration by

applicants or someone associated with the patent owner who is in a position to make such

assurances, or a statement by an attorney of record over his or her signature must be made,

stating that the deposit has been made at an acceptable depository and that the criteria set forth in

37 CFR 1.801-1.809, have been met.

Amendment of the specification to disclose the date of deposit and the complete name

and address of the depository is required.

If the deposit was made after the effective filing date of the application for a patent in the

United States, a verified statement is required from a person in a position to corroborate that the

hybridomas described in the specification as filed are the same as that deposited in the

depository. Corroboration may take the form of a showing of a chain of custody from applicant

to the depository coupled with corroboration that the deposit is identical to the biological

material described in the specification and in the applicant's possession at the time the

application was filed.

Applicant's attention is directed to In re Lundak, 773 F.2d. 1216, 227 USPQ 90 (CAFC

1985), and 37 CFR 1.801-1.809 for further information concerning deposit practice.

Claim Rejections - 35 USC § 112, second paragraph

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the

subject matter, which the applicant regards as his invention.

10/774,887

Art Unit: 1646

Claims 32, 34, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 32 recites the limitation "the IL-5" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 32 recites the limitation "the binding" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 34 recites the limitation "the binding" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 34 recites the limitation "the IL-5" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 32, line 6, is improper because it recites the limitation "bins to" rather than the correct "bind to".

Claim 34, line 6, is improper because it recites the limitation "bins to" rather than the correct "bind to".

Claim 32, lines 3-4, is vague and indefinite because it recites "a BION-1 monoclonal antibody" rather than "monoclonal antibody BION-1".

Claim 32, lines 3-4, is vague and indefinite because it recites "a BION-1 monoclonal antibody" rather than "monoclonal antibody BION-1".

## Conclusion

No claim is allowed.

Claims 32, 34, are rejected.

Application/Control Number:

10/774,887 Art Unit: 1646

## Advisory Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prema Mertz whose telephone number is (571) 272-0876. The examiner can normally be reached on Monday-Friday from 7:00AM to 3:30PM (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Nickol, can be reached on (571) 272-0835.

Official papers filed by fax should be directed to (571) 273-8300. Faxed draft or informal communications with the examiner should be directed to (571) 273-0876.

Information regarding the status of an application may be obtained from the Patent application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
